

NIU Planned Contributions to SMTF

- 2002 EOI on “Photoinjector III” (verbage may be useful for SMTF EOI)
- 100-CPU Computational Laboratory and supporting simulations (already in hand)
- New photocathode drive laser
- Federal Appropriations Requests (optimistic about success!):
 - FY05 – 2 M\$
 - FY06 – 4 M\$
- Beam Diagnostics and Instrumentation Laboratory:
 - To be built/staffed from Federal Appropriations
 - NIU would take full responsibility for beam diagnostics *if* sufficient other funds were allocated
